

The Secretary of the Army is authorized to allot from any appropriations heretofore or hereinafter made for flood control, not to exceed \$10,000,000 per year, for the construction, repair, restoration, and modification of emergency streambank and shoreline protection works to prevent damage to highways, bridge approaches, public works, churches, hospitals, schools, and other nonprofit public services, when in the opinion of the Chief of Engineers such work is advisable: *Provided*, That not more than \$250,000 shall be allotted for this purpose at any single locality from the appropriations for any one fiscal year.

(b) *Policy*. Work under the Section 14 authority shall serve to prevent flood or erosion damages to endangered highways, highway bridge approaches, public works, and nonprofit public facilities by the construction or repair of emergency streambank and shoreline protection works. Eligible highways consist of major highway systems of national importance, and principal highways, streets, and roads of importance to the local community, such as arterial streets, important access routes to other communities and adjacent settlements, and roads designated as primary farm-to-market roads.

(1) Work under this authority is not limited in engineering scope but the design must be an integrally complete within itself project that does not require additional work for effective and successful operation. The cost limitation on Federal participation may require that local interests supplement the Federal funds, so that combined Federal and local efforts will produce a complete, useful improvement.

(2) Reporting officers must be satisfied that the protection of eligible public works and non-profit public services are justified on the basis of the National Economic Development and Environmental Quality objectives.

(c) *Legislative interpretations*. (1) “Public Works” are considered to be those important and essential public facilities which serve the general public and are owned and operated by the Federal, State, or local governments, such as municipal water supply systems and sewage disposal plants.

(2) “Churches, hospitals, schools” includes churches, and public and private non-profit hospitals and schools.

(3) “Non-profit public services” are considered to be facilities or structures

which serve the general public and are not intended to earn a profit. Although they may be publicly used, privately owned, profit-making facilities located along streambanks or shore lines are not eligible for protection.

(4) “Shoreline” includes, but is not limited to, oceans, gulfs, and the Great Lakes.

(d) *Local cooperation*. The provisions of § 263.23(d) are applicable.

#### Subpart D—Shore Protection Policy

##### **§ 263.26 Small beach erosion control project authority (Section 103).**

(a) *Legislative authority*. Section 103(a) of the River and Harbor Act of 1962, as amended by section 310 of the River and Harbor Act of 1965 and by section 112 of the River and Harbor Act of 1970, amends section 3 of Pub. L. 826, 84th Congress to read as follows:

The Secretary of the Army is authorized to undertake construction of small shore and beach restoration and protection projects not specifically authorized by Congress, which otherwise comply with Section 1 of this Act, when he finds that such work is advisable, and he is further authorized to allot from any appropriations hereafter made for civil works, not to exceed \$25,000,000 for any one fiscal year for the Federal share of the costs of construction of such projects: *Provided*, That not more than \$1,000,000 shall be allotted for this purpose for any single project and the total amount allotted shall be sufficient to complete the Federal participation in the project under this section including periodic nourishment as provided for under section 1(c) of this Act: *Provided further*, That the work shall be complete in itself and shall not commit the United States to any additional improvements to insure its successful operation, except for participation in periodic beach nourishment in accordance with section 1(c) of this Act, and, as may result from the normal procedure applying to projects authorized after submission of survey reports.

(b) *Periodic nourishment*. When it can be demonstrated as being part of the best plan to meet project objectives and a more economical remedial measure than others, provision for periodic nourishment may be recommended. The recommended Federal participation in periodic nourishment will be limited to a specific period of time. The total project costs shall include

both initial construction and periodic nourishment.

(c) *Local cooperation.* The provisions of ER 1120-2-110 and ER 1165-2-19 are applicable.

**§ 263.27 Authority for mitigation of shore damage attributable to navigation works (Section 111).**

(a) *Legislative authority.* Section 111 of the River and Harbor Act of 1968 (Pub. L. 90-483, approved August 13, 1968) states:

The Secretary of the Army, acting through the Chief of Engineers is authorized to investigate, study, and construct projects for the prevention or mitigation of shore damages attributable to Federal navigation works. The cost of installing, operation and maintaining shall be borne entirely by the United States. No such projects shall be constructed without specific authorization by Congress if the estimated first cost exceeds \$1,000,000.

(b) *Definitions*—(1) *Federal navigation works* is defined as a project or feature thereof that has been specifically authorized by the Congress in a River and Harbor Act or authorized under the continuing authorities granted by section 201 or the Flood Control Act of 1965, or by section 107 of the River and Harbor Act of 1960, as amended. These shall include projects or project features built by others but which have been adopted as a Federal Navigation project.

(2) *Beach erosion control project* is defined as a project that has been specifically authorized by the Congress in a River and Harbor Act or authorized under the continuing authorities granted by section 201 of the Flood Control Act of 1965 or by section 103 of the River and Harbor Act of 1962. This is considered to include the beach erosion control portion of combined beach erosion and hurricane protection projects.

(3) *Mitigation of shore damages* is defined as the construction of works or procedures to reduce erosion-type damages by shoreline stabilization. The degree of mitigation is the reduction of erosion or accretion to the level which would be obtained without the influence of navigation works at the time navigation works were accepted as a Federal responsibility. It is not intended that shorelines be restored to

historic dimensions, but only to lessen the damages by an action that can be justified, the entire costs of which are Federal regardless of shore ownership.

(c) *General policies.* (1) This Act authorizes the study, construction and maintenance of work for prevention or mitigation of damages to both public and privately owned shores to the extent of the damages that can be directly identified and attributed to Federal navigation work located along the coastal and Great Lakes shorelines of the United States. This authority will not be used:

(i) For construction of works for prevention or mitigation of shore damages such as those caused by river bank erosion or vessel generated wave wash.

(ii) To modify navigation projects authorized, but not constructed, that contain features for prevention or mitigation of shore damages or to change the responsibility for maintenance or to modify portions of constructed navigation projects that contain features for prevention or mitigation of shore damages.

(iii) For prevention or mitigation of shore damages caused by non-Federal navigation projects.

(iv) To construct, maintain, modify or change the cost sharing of authorized beach erosion or combined beach erosion and hurricane protection projects, or portions thereof, located adjacent to Federal navigation projects. Except, when it is determined that shore damage to a portion of an authorized beach erosion project is attributable to the navigation project, mitigation measures may be accomplished under this authority, only to the extent of damages that can be directly identified and attributed to the navigation project.

(2) Where the erosion attributable to the Federal navigation project consists of only a portion of the total erosion problem in a specific area and cannot be considered as a separable reach for effective mitigation measures then a section 111 project cannot be considered for authorization unless,

(i) There is an authorized beach erosion control or combined beach and hurricane protection project for the
